SUMMARY

MERN Stack Developer and currently a final-year Computer Science student specializing in AI-powered full-stack web applications. Developed 4 production-style projects spanning 20+ REST API endpoints, JWT-based authentication, LLM integration, an autonomous multi-source research pipeline, and a 3D mobile virtual-lab app. Focused on Generative AI, prompt engineering, and RAG.

EDUCATION

Birla Institute of Applied Sciences — Bhimtal, India
Bachelor of Technology in Computer Science and Engineering — CGPA: 7.3/10 (Expected 2027)
Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering
St. Lawrence Sr. Sec. School — Haldwani, Uttarakhand
Senior Secondary (Class XII), CBSE — 86% — 2023
St. Lawrence Sr. Sec. School — Haldwani, Uttarakhand
Secondary (Class X), CBSE — 88% — 2021

EXPERIENCE

Independent Full-Stack Developer — Project Experience

- Designed and developed 4 production-style full-stack and mobile applications using the MERN stack, React Native, REST APIs, JWT authentication, MongoDB, and modern React workflows.
- Built 20+ REST API endpoints, role-based access controls, database schemas, responsive interfaces, and integrated LLM-powered features across resume, e-commerce, and research applications.

PROJECTS

LabVR — 3D Virtual Labs | React Native (Expo), three.js, react-three-fiber, react-native-svg, AsyncStorage

- Built a fully offline NCERT virtual-lab app (Classes 8–12) with 3D lab benches and SVG instruments (stopwatch, metre scale, balance); one complete lab: Class 11 Physics, box on an inclined plane.
- Enforced least-count and significant-figure rules on student readings and injected seeded instrument errors (zero error, parallax, stopwatch lag) so results show realistic measurement error.
- Implemented a real-time physics engine (fixed 1/240 s integrator, energy accounting), least-squares graphs from the student's own data, and a closing report that traces each fault to its effect on θ, a and μ.

AI-Powered Gen-Z Fashion E-Commerce Platform | React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Cloudinary

- Built a MERN fashion storefront covering discovery, authentication, cart, checkout, order tracking, reviews, and admin workflows.
- Implemented Redux Toolkit state management, Cloudinary media handling, responsive React/Tailwind UI, and JWT-based authorization.
- Added an AI shopping assistant using LLM APIs for conversational product discovery and personalized recommendations.

AI Resume Analyzer & Resume Builder | React.js, Node.js, Express.js, MongoDB, OpenRouter, REST APIs

- Built an AI resume platform with ATS scoring, missing-skill detection, keyword optimization, job-role matching, and resume rewriting.
- Designed 10+ secured REST APIs with JWT for resume parsing, editing, analysis, and version management; modeled 4 MongoDB collections.
- Integrated OpenRouter LLMs to turn resume and job-description data into contextual, ATS-focused recommendations.

DeepResearch AI — Autonomous Research Platform | React.js (Vite), Node.js, Express.js, MongoDB Atlas, Gemini API, JWT

- Built and deployed a full-stack platform that turns a natural-language question into a citation-backed report through a staged pipeline: planning, multi-source search, content extraction, claim analysis, independent verification, and synthesis.
- Integrated Gemini for planning, analysis, and synthesis with 7 search sources (Tavily, Serper, DuckDuckGo, Google News, Wikipedia, OpenAlex, Crossref); built an evidence engine storing confidence-scored claims cross-checked against independent sources, with tasks run in parallel via an in-memory job queue.
- Implemented JWT auth (access + refresh tokens, Axios auto-refresh), REST APIs for jobs, reports, and history, live pipeline-stage polling, and a React + react-three-fiber glassmorphism dashboard.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL
Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS, Redux Toolkit, React Router, Vite
Backend: Node.js, Express.js, REST APIs, JWT, Authentication, Authorization
Databases: MongoDB, MongoDB Atlas, Mongoose, MySQL
AI / Generative AI: LLM APIs, Prompt Engineering, RAG, AI Agents, LLM Integration, OpenAI API, Gemini API
Tools & Deployment: Git, GitHub, Postman, Cloudinary, Expo, three.js, Vercel, Render, VS Code
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Development

SOFT SKILLS

Leadership, Team Collaboration, Problem Solving, Communication, Adaptability

CERTIFICATIONS

- Finalist — Hack the Future 3.0 National Level Hackathon
- Back End Development and APIs — freeCodeCamp
- JavaScript Algorithms and Data Structures — freeCodeCamp
- Graphethon Certificate — Graphic Era Deemed to be University, 2025

ACHIEVEMENTS

- Finalist — Hack the Future 3.0 National Level Hackathon.
- Graphethon — secured a Top 25 position among participants across India.
- Participated in Smart India Hackathon (SIH) 2024, NASA Hackathon 2024, and other hackathons, building full-stack solutions under tight time constraints.
